

# IDS Aviation VMS Software as a Service

IDS Aviation VMS is an Australian owned and operated Aviation Compliance Software as a Service application which brilliantly manages the issuance of Visitor Identification Cards (VIC's) Aviation Security Identification Cards (ASIC's) Airside Vehicle Permits (AVP's) and Authority to Drive Airside (ADA's) for several Airports Australiawide.

## Benefits of Software as a Service

- ✓ **Easy to Implement**  
No software installation required. Historical data cleansed and imported by Identity Security prior to Go Live. Our on-line training video portal implementation is quick and seamless.
- ✓ **Scalable to airports of any size**  
As IDS Aviation is built with a collaborative approach the application contains many add-ons and modules, which can be added and subtracted based on your airport requirements.
- ✓ **Continuous improvements and software updates**  
All updates are included in the annual subscription.  
We'll send you a notification every time there's something new.
- ✓ **Pay only for what you use**  
Our Annual Subscription is based on usage and is modular.
- ✓ **No set up costs**  
All set up costs (except optional on site training) are included in the annual subscription.
- ✓ **Phone and 24/7 Online support**  
24/7 Online ticket support and phone support during business hours.

Request an online demonstration by contacting Identity Security 1300 70 90 28 or [support@idsecurity.com.au](mailto:support@idsecurity.com.au)

## Specifications

IDS Aviation VMS relies on your connection to the Internet to our server. It has been designed to work on most window-based workstations or Tablets, Android and iPhones. We recommend ADSL or higher network including 4G Networks.

**Supported Browsers:** Microsoft Edge, Chrome, Safari & Firefox
