IDS Aviation VIC Issuing & Web Preregistration Module

Identity Security's VIC(Visitor Identification Card) Issuing Module is the core Module of IDS Aviation.

It brilliantly manages the 28 day rule and it's rules, card statuses of visitors from VIC Holder to ASIC Sponsor,

the issuing of cards, the Department of Transport reporting requirements and much more.

VIC Issuing Features & Benefits

✓ VIC Issuing has four card types including Same Date, 24 hour, Multi-Day & Manual VIC's for backdated visits

✓ The visitor database is categorised by card status's from VIC Holder, ASIC Pending, ASIC Issued to ASIC Expired

✓ 24 hour hour card type has bleed through labels which self expire in 24 hours eliminating the need to return VIC's saving time chasing expired cards

✓ Multi-level user permissions including Issuing Body Administrator, Airport Operator, Airport Agent Administator & Agent Operator

✓ Dashboard displays workstations and itemises visits from the issuing entry point

✓ Several download-able and useful reports including VIC Register for the Department of Transport

✓ Induction Records module is now included in the VIC Issuing Module which records inductions and expiry of as well as a customisable induction print file displaying these details.

✓ Temporary ASIC Card type is also available which prints a temporary ASIC for ASIC Holders who don't have a VIC on their person

✓ Print Files can be produced for a Standard Printer, Card or Label Printer

✓ The Web Preregistration module enables visitors to enter their data and photo prior to their visit saving ARO's time on data entry and paper handling.

✓ Company database stores operational need and Authorised Person contact

✓ The help menu has embedded training video's to assist users

✓ 24 hour access to training site. Download cheat sheets and self training tools
